

**WEBB COUNTY-CITY OF LAREDO REGIONAL MOBILITY AUTHORITY  
PROCUREMENT OF GEC SERVICES**

**Response to Questions Received Pursuant to RFQ Section VII**

1. Given that the general Scope in Section III of the RFQ provides that construction oversight is part of the GEC Scope and that Section 6.3.1 lists typical GEC project-specific services, then can we assume a construction oversight task takes place after PS&E Management within the list currently provided in 6.3.1? The list would read as follows:
  1. Contract Support
  2. Administrative Assistance
  3. Advanced Project Development
  4. PS&E Management
  5. Construction Oversight
  6. Management and Coordination of Maintenance Services
  7. Operations

The intent of the list set forth in Section 6.3.1 is to outline the services expected to be provided by the GEC from an established field office. The GEC should expect to provide the WC-CL RMA with typical GEC project-specific services from this office, including, if requested, construction oversight. That does not mean that the GEC will provide construction oversight in all instances or for all projects.

2. Can the foldout page, mentioned in Section 6.6.1, be longer than 17" wide by 11" tall size so long as it folds neatly into a standard 8.5" wide by 11" tall size?

Yes.

3. Does the two foldout page limit only pertain to the 30-page response or does the limit also apply to the Appendix?

The two foldout page limit described in Section 6.6.1 applies to the 30-page response.
